	EGB Material (engl.)	Dokument:	BA01
		Stand	2026
		Revision	03

Purchasing terms and conditions (EGB) for raw and finished materials

1. Finished goods - regrind (ground material, granules)

- Regenerate must meet the agreed-upon quality standards, be dry, and free of foreign matter!
- Regenerate must be free of other polymers.
- Regenerate must be free of paints, dust, dirt, oils, and greases.
- Clear labeling on neutral packaging is mandatory!
- Maximum load weight per container (big bag, octabin) is 1,200 kg, on undamaged pallets!
- Only new, undamaged big bags or octabins may be used!
- For domestic suppliers: Ground material/granules are considered a product; therefore, VAT must be charged!
- A loading list with the individual net weights must be included with the delivery note.

2. Raw material (production waste)

- Only agreed-upon fractions will be accepted!
- Separated by type (unless otherwise agreed) in clearly marked containers (plastic boxes, wire mesh boxes, octabins, pallet boxes), on undamaged pallets; in big bags only after prior consultation!
- Flame-retardant, painted, and foamed material only if expressly agreed upon, and must be unmixed!
- Free of foreign materials such as paper, cardboard, metal, stickers, wood, polystyrene, stones, and foam
- Dry, dust-free, free of dirt, oil, and grease
- For domestic suppliers: Waste is subject to the German Scrap Metal Ordinance (SchrottVO), therefore no VAT should be charged, with a corresponding note on the invoice!

3. Used plastic waste (garbage cans, plastic boxes, hollow objects)

- **Clean, free of coarse dirt, no residual contents!**
- Garbage containers without wheels, stacked, not crushed
- no contamination with acids, varnishes or other harmful contents
- Transport boxes without inserts (e.g. PU foam)
- Do not mix with waste subject to the POPs Regulation.

4. Loading upon collection by RDG or transporter

- On the agreed collection day, material must be ready for priority loading of the truck
- Transportability must be guaranteed
- note exchangeable empty containers on the delivery note or consignment note
- After loading, immediately email the delivery note with the loading list to RDG

5. Receipt inspection and measures in the event of deviations

- Every delivery is weighed on a calibrated weighbridge. Any deviations (after deducting the weight of the loading equipment) will be reported to the supplier immediately so that the delivery documents can be corrected.
- Deviation from the order: truck unloading is stopped and the supplier is contacted
- Rejection in the event of major discrepancies or non-agreement
- Quality checks after unloading, deviations are documented and the supplier is notified.
- Billing of disposal costs, currently EUR 0.26/kg, if material cannot be processed, sorting and pro rata freight costs incurred, analysis costs if applicable

6. Waste disposal services

The supplier undertakes not to mix flame-retardant materials (containing POPs), materials with other prohibited substances (e.g., PFAS), or other waste subject to prohibitions.

These wastes must be handed over to authorized waste collectors in accordance with legal regulations. Stand:
